 How to use to grow and show
 <u>The American Dahlia Society</u>

1. Background

- Published by ADS yearly and provided to ADS Members
- Dahlia cultivars are included in the classification manual based on North America show results

Criteria for inclusion (p. 2)

CLASSIFICATION BOOK BACKGROUND

Due to the Covid-19 pandemic and no or very few dahlia shows in 2020, no 2021 Classification and Handbook of Dahlias (CHD) was published. This CHD edition, 2022, includes all cultivars from the 2020 CHD (No cultivars were removed for not fulfilling rule #2 from criteria for inclusion to the CHD), cultivars that passed the Trial Garden and Seedling Bench Evaluation in 2020 and 2021, and any cultivar winning at least 2 blue ribbons in 2021 shows.

CRITERIA FOR INCLUSION OR DELETION FROM THE CLASSIFICATION AND HANDBOOK OF DAHLIAS

- A cultivar that wins two blue ribbons in ADS-affiliated shows in a given year will be initially listed - or relisted after being dropped from the CHD.
- A cultivar must win three blue ribbons during the last two-year period to remain listed.
- A cultivar with a score of 85.0 or greater from either an official trial garden or seedling bench evaluation will automatically be listed for at least two years.
- A cultivar that receives a classification committee change recommendation will be included in the CHD the ensuing year even if it does not receive two blue ribbons.

CULTIVAR CLASSIFICATION AND CHANGE REQUEST RULES AND PROCEDURES

- All those who make cultivar classification change requests must be members of the American Dahlia Society.
- 2. For each change request, you must employ the following procedure: List the a) Current Cultivar Number, b) Cultivar Name, c) Cultivar Size, Form, and Color, d) Name of Person Requesting Change, e) Suggested Number of Cultivar Change, and f) the Change by Description. (For example, if the cultivar were Red (R), and the desired change were dark red (DR), Chip DR3 you would write in DR3 after the cultivar number change.
- Cultivars that repeatedly receive requests for change may be retired from the change request process.
- No request for cultivar classification change will be included without a break of at least one year from the last change request.
- All requests for change in cultivar color classification must include American Dahlia Society Color Guide, 2003 chip identification, such as change cultivar XYZ from YL22 to BR10. Send classification change requests to any member of the Classification committee (members are listed on the inside front cover of the CHD).

LENGTH OF CULTIVAR NAMES

The ADS Executive Board decided that more than 22 characters in a cultivar name will be truncated. Be aware that letters, numbers, spaces,

JUDGING SIZE, FORM AND COLOR

Disseminated dahlias, when entered by ADS Classification standards in ADS shows, will NOT be eliminated or disqualified for either oversize or undersize, misclassified form, or a variation in color or form from the classification book. Judges will assess a dahlia bloom strictly on its merits or deficiencies, such as color fading or insufficient ray florets and gaps in contour. Whenever the size, form or color of a cultivar exhibits characteristics other than classified, the cultivar should be submitted as a candidate for reclassification. Judges will also evaluate all of the scorecard characteristics by weighing each of them, and not solely basing their judgments on the merits or lack thereof for one quality, such as trueness to form. Note: The ideal form descriptions that appear here and in the *Guide to Judging Dahlias* are designed to help judges rank some of the fine points of a variety's formation and should not eliminate or disqualify an entry.

FORM

All dahlias in classes 0001 through 7715: Formal Decorative, Informal Decorative, Semi-Cactus, Cactus, Incurved Cactus, Laciniated, Ball, Miniature Ball, Pompon, Stellar, Waterilly and Novelty Double are fully double with the central rays spirally displayed. The mature petals that determine the size of the dahlia determine the dahlia formation. In the following descriptions, the "X" in the number range signifies size and can be replaced with 0 (AA), 1 (A), 2 (B), 3 (BB), 4 (M) or 5 (MC).

X001—X015 FORMAL DECORATIVE Dahlias: Ray florets are generally flat, broad, and smooth in a regular arrangement that gradually recurve toward the stem. Each ray floret row should convey uniform and regular size arrangement with the tips preferably round or extending to a slight point. The ideal depth is three-quarters the diameter of the bloom and should not be greater than its diameter.

X101—X115 INFORMAL DECORATIVE Dahlias: Ray florets may be twisted, curled, or wavy, and of uniform size in a regular or irregular arrangement. They may be partially involute or revolute, but no portion should be fully revolute or involute except at the tip of the ray floret. The ideal depth is threequarters the diameter of the bloom and should not be greater than its diameter.

X201—X215 SEMI-CACTUS Dahlias: Ray florets are broad at the base, straight or incurved, and reflex toward the stem in a regular and uniform arrangement. Ray florets will be revolute for approximately half their length and fully revolute (touching or overlapping) for at least one-fourth their length. The ideal depth is three-quarters the diameter of the bloom and should not be greater than its diameter.

X301—X315 STRAIGHT CACTUS Dahlias: Ray florets are narrow at the base, straight, uniform in length and reflex toward the stem, radiating uniformly in all directions from the center. They will be revolute for the majority of their length and fully revolute (touching or overlapping) for approximately half their length. A depth of about three-quarters the diameter is ideal for this form.

X401—X415 INCURVED CACTUS Dahlias: Ray florets are pointed, narrow at the base, uniform in length and arrangement, revolute for the majority of their length, and fully revolute for at least half their length. They will curve upward to the bloom face, but may also arc downward and then up, or they may swirl horizontally around the bloom circumference, usually exposing the involucre in either case. Depth must be at least half the diameter.

X501—X515 LACINIATED Dahlias: Ray florets are split at the tip with the number and depth of the splits varying according to the size of the ray floret. The portion of the ray floret with the splits should uniformly twist or curl whether involute or revolute. The less mature ray florets should possess splits but do not have to twist or curl. In the ideal laciniated dahlia, the majority of ray florets will be uniformly arranged with a split, twist, or curl that conveys an overall fringed or frilled effect. Ray florets, slightly involute or revolute, that split regardless of length and remain generally flat are a major fault. Ray florets with a shallow notch or cleft and possessing little twisting to the extreme portion should not be classified as laciniated. The ideal depth is three-quarters the diameter.

6001—6015 BALL Dahlias: Blooms are ball shaped with uniform florets, involute for most of their length, and fully involute for more than half the length; the ray florets reflex completely toward the stem. Ray floret tips in cross-section should be circular and exhibit little distortion, completely filling the floral head and are either round or blunt without notch or point.

6101—6115 MINIATURE BALL Dahlias: Except for size, miniature ball and ball dahlias possess the same form features.

6201—6215 POMPON Dahlias: The ray florets are involute for the whole of their length and fully involute for half their length. Except for size they are similar to the ball description.

7001—7015 STELLAR Dahlias: Ray florets are long and narrow along their length with pointed tips preferred; like a star, they exhibit space between the ray florets in each of the rows and possess a uniform, regular arrangement. All the ray florets will have a partially involute form in an approximate "U" shape in cross-section for the majority of their length and will recurve toward the stem; the bloom depth should be greater than one half of the diameter but should not be greater than its diameter.

7101—7115 MICRO STELLAR Dahlias: Micro Stellar dahlias possess the same formation as Stellar dahlias except they are up to 2 inches in diameter.

7301—7315 WATERLILY Dahlias: The bloom should be fully double and symmetrical; the side view should be flat to saucer-shaped in arrangement, and the layer of florets should be open faced to give a delicate appearance. The center should be closed and dome-shaped breaking gradually to four to seven rows of fully developed outer florets. Outer florets should be broad and slightly cupped with rounded tips. A bloom position at 45 degrees is preferred, but a top facing bloom is acceptable. In petite waterlily cultivars (from 1 to 3 inches) in diameter, the depth may contain fewer rows of ray florets in order to represent the waterlily form accurately. The depth should never be more than one-half the diameter of the bloom.

7401—7415 MICRO WATERLILY Dahlias: Micro Waterlily dahlias possess the same formation as Waterlily dahlias. In micro waterlily cultivars (up to 2 inches in diameter), the depth may contain fewer rows of ray florets in order to represent the waterlily form accurately. The depth should never be more than one-half the diameter of the bloom.

7601—7615 NOVELTY FULLY DOUBLE: dahlias will display distinct and different form from present classifications. The new formation must display good symmetry, including a closed, tight center, ray florets uniformly shaped and/or arranged differently from other fully double form characteristics.

7701—7715 MICRO NOVELTY FULLY DOUBLE: dahlias will display distinct and different form from present classifications. The new formation must display good symmetry, including a closed, tight center, ray florets uniformly shaped and/or arranged differently from other fully double form characteristics and be up to 2 inches.

8001—8015 PEONY Dahlias: At least two, but not more than five rows of ray florets surround the disc. Ray florets are broad, generally flat to slightly cupped and evenly spaced in a flat plane. Ray florets are equal or nearly equal in length from the bloom face to the back, not recurving or reflexing to the stem. Ray florets adjacent to the disc may be twisted or curled, but if present should be symmetrically arranged around the disc. Ideal depth is less than one-third the diameter. Disc flowers with 0 to 3 rows of pollen are desirable.

8101—8115 MICRO PEONY Dahlias: Micro Peony dahlias possess the same formation as Peony dahlias except they are up to 2 inches in diameter.

8201—8215 ANEMONE Dahlias: A dome of elongated tubular disc florets surrounded by one or more rows of ray florets. The ray florets should be uniform in shape, size and formation and be regularly arranged around the disc florets. The ray florets should be visible from the face of the bloom, creating a pleasant and balanced framing of the dome. The disc florets should also be uniform in shape, size and formation and be fully developed. Each disc floret should be entirely tubular or predominantly tubular with a fringed tip.

8301-8315 MICRO ANEMONE Dahlias: Micro Anemone dahlias possess the same formation as Anemone dahlias except they are up to 2 inches in diameter. 8601—8615 NOVELTY OPEN Dahlias: Dahlias with characteristics distinct and different from the present classifications are classified as novelty dahlias. The center should be open with the disc center in proper proportion to the ray florets.

8701—8715 MICRO NOVELTY OPEN Dahlias: Micro Novelty Open dahlias possess the same formation as Novelty Open dahlias except they are up to 2 inches in diameter.

9001—9015 COLLARETTE Dahlias: A bloom will have a single row of flat or slightly cupped ray florets arranged in a flat plane; the ray florets will uniformly overlap, preferably in the same direction with no gaps. The petaloids surrounding the disc should be approximately one-half to two-thirds the length of the ray florets. Eight ray florets are most desirable. A round floret tip is preferred. Disc flowers with 0 to 3 rows of pollen are desirable.

9101—9115 MICRO COLLARETTE Dahlias: Micro Collarette dahlias possess the same formation as Collarette dahlias except they are up to 2 inches in diameter.

9201—9215 ORCHID Dahlias: A single row of uniform, evenly spaced ray florets arranged in a flat plane surround the disc flowers. The ray florets should be straight and involute for two-thirds or more of their length and fully involute for at least one-third their length. Eight ray florets are most desirable. Disc flowers with 0 to 3 rows of pollen are desirable.

9301—9315 MICRO ORCHID Dahlias: Micro Orchid dahlias possess the same formation as Orchid dahlias except they are up to 2 inches in diameter.

9401—9415 ORCHETTE Dahlias: A bloom combines the involute characteristics of the orchid dahlia form and the petaloid characteristics of the collarette form. Ideally, eight ray florets uniformly surround the disc flowers in a flat, even plane. Ray florets should be straight and involute for at least half of their length and fully involute for at least one-fourth of their length. Ray florets should possess a corresponding petaloid at their base. Petaloids should be of a length which gives visual impact and not so small that they are not easily discernible at arm's length. Petaloids may lie flat within the base of the ray floret or slightly rise and/or cup upward toward the center of the bloom. Disc flowers with 0 to 3 rows of pollen are desirable.

9501—9515 MICRO ORCHETTE Dahlias: Micro Orchette dahlias possess the same formation as Orchette dahlias except they are up to 2 inches in diameter.

9601—9615 SINGLE Dahlias: The bloom has a single row of flat or slightly cupped ray florets arranged in a flat plane. They uniformly overlap, preferably in the same direction with no gaps. Eight ray florets are most desirable. Disc flowers with 0 to 3 rows of pollen are desirable. A round floret tip is preferred. The bloom is over two inches in diameter.

> 9701—9715 MIGNON SINGLE Dahlias: Mignon single dahlias possess the same formation as single dahlias. Disc flowers with 0 to 3 rows of pollen are desirable. The bloom is up to two inches in diameter.

SEMDS 2023 DAHLIA SHOW

Flower of the Year - any 9xxx classification dahlia (Collarette, Orchid, Orchette, or Single)

Bob Barner, Memorial – Just Peachy, classification 3210

Lionel Robbins Memorial – any big yellow dahlia 💛, classifications; AA 0x02 or A 1x02

9701—9715 MIGNON SINGLE Dahlias: Mignon single dahlias possess the same formation as single dahlias. Disc flowers with 0 to 3 rows of pollen are desirable. The bloom is up to two inches in diameter.

COLOR

White zero (WH 0) has been added to the white color class. It is the border (background) of the white color chip page.

Official Color Chart: The ADS Official Color Guide is the American Dahlia Society Color Guide for Classifying Dahlias, 2003. Note: 1) Light and Dark Blends will be blends dominated by colors from the recommended list below. Each ADS color is listed in either the Light or the Dark list and in only one of the lists. (2) Flame Blends will be blends containing one of the yellows listed plus one or more of the OR, RD, or BR colors listed. (3) If a blend has YL 1-YL 5 plus one of the OR, RD, or BR colors listed in the FL list, it will be a Light or Dark Blend, depending on which color dominates. For further clarification, see the Guide to Judging Dahlias, pp. 12-13.

Classification Procedures for Color in Fully Double Dahlias: Classification by color of fully double dahlias is determined by the color(s) appearing on either, or both, the face or reverse of the ray florets. The predominant color, as seen from 3 feet, will determine the color class and be listed first. All color designations will be in capital letters with the reverse ray floret color(s) enclosed in brackets []. A slash (/) will appear between the face and reverse colors. For instance, a fully double novelty dahlia shows lavender on the face of the ray floret and a light blend of pink and yellow on the reverse; if the dominating color is lavender (on the face of ray floret), the classification is NX -L, L/[LB/PK/Y]; if the dominating color is the light blend (on reverse of ray floret), the classification is NX-LB, [PK/Y]/L.

Classification Procedures for Color in Open-Centered Dahlias: Classification by color of open-centered dahlias is determined by the color(s) appearing on the face of the ray florets except in ORCHIDS and ORCHETTES that are classified by color on the reverse of the ray florets. The color(s) on the ray floret will be listed with a capital letter(s) with the predominant color listed first, and the color of bicolor ray floret tips, secondary color(s) of blends, and variegation(s) listed in order of predominance. A slash (/) will appear after the capital letter(s), and lower case letters will represent the color(s) of petaloids in COLLARETTES and ORCHETTES, domes of ANEMONES, eye zones where apparent, and the ray floret face of ORCHIDS and ORCHETTES. ORCHETTES will have a dash (-) after the face colors of the florets to describe the color(s) of the petaloids. For instance, an ORCHETTE has red reverse florets, yellow face and white petaloids. The classification would be OT R/y-w.

On occasion, petaloids, the face of an ORCHID or ORCHETTE, domes, and eye zones may appear variegated, as a blend, or bicolor. Judges should classify these cultivars with lower case letters (v for variegated, lb for light blend, db for dark blend, fl for flame blend, bi for bicolor) and insert them in front of the lower case color letters. For instance, the petaloids on a dark red COLLARETTE are variegated. The classification would be CO DR/v/pr/w. Thus, the variegated could then have a purple petaloid with white stripes or some other variegated distinguishing characteristic. For instance, an OR-CHETTE has dark red reverse color, light blend face floret colors and dark blend petaloids. The classification would be OT DR/b/pk/y-db/dr/w.

BLENDS: Light blends and dark blends are determined by the dominant (majority) blend color. For Example: cultivar XYZ has Purple 5 (a dark blend color) and yellow 1 (a light blend color) on the face of the ray florets. It will be a dark blend if the majority color is purple. It will be a light blend if the majority color is yellow. White in blends should be ignored when deciding if it's a light or dark blend. Or one may always think of white as the minority color when deciding the blend, no matter how much white is in the blend. There is no "majority" rule in flame blends. It does not matter which of the flame blend colors is the majority color as long as it fits in the color chips associated with flame blend.

01 WHITE: Pure white, ivory or cream with or without faint blushes of other colors. ADS Color Guide WH 0-9.

02 YELLOW: ADS Color Guide YL 1-24.

03 ORANGE: ADS Color Guide OR 1-24.

04 PINK: ADS Color Guide PK 1-24.

05 DARK PINK: ADS Color Guide DP 1-24.

06 RED: ADS Color Guide RD 1-24.

07 DARK RED: ADS Color Guide DR 1-12.

08 LAVENDER: ADS Color Guide LV 1-24.

09 PURPLE: ADS Color Guide PR 1-36 and BLACK.

10 LIGHT BLEND: Blends dominated by the lighter tints and tones of pink, yellow, lavender, and other pastels; also two-toned varieties of pastel tints and tones in which the central ray florets are of a different color than the marginal ray florets. Ignore white when determining a light or dark blend. Light blend colors include: YL 1 - YL 24; OR 1 - OR 10; OR 16 - 17; PK 1 - PK 24; DP 1 - DP 4; DP 6 - DP 8; DP 19 - DP 22; LV 1 - LV 8; LV 21 - LV 22; BR 1 - BR 3; BR 7 - BR 8; BR 10 - BR 11.

11 BRONZE: ADS Color Guide BR 1 - 24.

12 FLAME: Blends of red or orange hue that merges with yellow. All blend cultivars possessing these color chips are Flame Blends. Flame blend colors include: YL 6 - YL 24 combined with OR 12 - OR 15; OR 19 - OR 24; RD 1 - RD 24; BR 9; BR 14.

13 DARK BLEND: Blends dominated by dark reds, pinks, purples, oranges, lavenders and bronzes. Ignore white when determining a dark blend. Dark blends include: OR 11. OR 15; OR 18 - OR 24; DP 5; DP 9 - DP 18;

ADS Classification and Handbook of Dahlias Color → Glossary of Terms

DP 23 - DP 24; LV 9 - LV 20; LV 23 - LV 24; RD 1 - RD 24; DR 1 - DR 12; PR 1 - PR 36; BR 4 - BR 6; BR 9; BR 12 - BR 24.

14 VARIEGATED: Two or more distinct colors on the face or reverse of the ray florets, the variegating color arranged in dots, flecks, splashes, stripes, or narrow lines, which contrast with the basic color(s).

15 BICOLOR: Two or more distinct, clear and sharply separated colors on the face of the ray florets with the tip or central stripe contrasting. Classify all blends (FL, LB, DB) and variegated with bicolor tips as bicolors.

GLOSSARY OF TERMS

Blend: two or more merging colors on either the face or reverse of the ray floret OR two or more contrasting colors on either the face or reverse of the ray floret.

Central Rays: the short or immature ray florets comprising the central portion of the fully double flowers when at their prime stage.

Disc: a more or less flat, circular group of tubular florets fully visible in open-centered type dahlias.

Disc Florets: small tubular florets which make up the central part of the flower head, each with a pistil and stamens but generally no other conspicuous flower parts.

Dwarf: dahlia varieties that normally do not produce plant growth over 24 inches in height.

Eye Zone: a uniform band of contrasting color(s), less than one third the length of ray florets that surround the open-centered disc flowers.

Floret: one of the small flowers that collectively comprise the flower head.

Fully Double: flower heads with multiple rows of ray florets; the disc florets are immature and completely covered by the central rays when a bloom is at the orime stage.

Incurved: the ray florets curve forward along their length toward the face of the flower head.

Involute: margins of the ray florets roll inward along their longitudinal axis (length). When fully involute the margins touch or overlap so only the reverse of the floret is visible, appearing quill like.

Laciniated: the tip of the ray floret exhibits single or multiple splits, with adequate depth; tips either involute or revolute and twist in an irregular manner to present a fringed/frilled effect.

Margin: the edge of the ray floret, sometimes marked with a narrow contrasting color.

Marginal Rays: fully developed ray florets that establish and determine the maximum diameter of a bloom; mature florets rather than immature central ray florets. Petal: the common name for the conspicuously colored part of a ray floret.

Petaloids: additional floral parts on ray florets having the form and appearance of smaller petals. Most noticeable in the collarette and orchette dahlias.

Picotee: fine line of contrasting color found on the margin of the ray floret.

Ray Florets: one of the broad, conspicuously colored florets, the structure of which suggests a single petal of an ordinary bloom. These form the radiating border in the open-centered type dahlias, or massed together, the flower head in fully double types.

Recurved: the ray florets curve backward along their length toward the stem.

Reflexed: A straight ray floret from the tip to the base that extends and drops toward the stem.

Revolute: margins of the ray florets roll back along their longitudinal axis (length). When fully revolute, the margins touch or overlap.

Straight: the ray florets have little or no curvature throughout their length.

CULTIVAR DISSEMINATION

UNDISSEMINATED CULTIVARS

Introduction:

Cultivars submitted to the Trial Gardens (TG) and for Seedling Bench Evaluation (SBE) must comply with the eligibility rules for undisseminated dahlias. These cultivars must be 1) initially grown from seed and propagated for a total of two years, minimum (eligible on third year), or 2) a mutation or sudden variation or change in color, form, size or other characteristic of a dahlia plant or plant part "sport" perpetuated by vegetative propagation rather than from seed in the first year and then propagated for a minimum of three years total and during this period has demonstrated no reversion to the original variety. All sports, whether multicolored or solid, are eligible for submission to the SBE or TG as an undisseminated cultivar.

In order for cultivars, domestic or foreign, to qualify as undisseminated and be eligible for TG and or SBE, they must not be available to the public by any means. All stock of a cultivar within the confines of the United States or Canada must be controlled by one individual (originator, introducer, and/ or grower) and be entered into competition by its cultivar identification, the name of originator and the name of the exhibitor. Dissemination Practices and Rules:

Sports: Only tuber entries of a sport are acceptable for trial garden evaluation.

Naming and Exhibiting Undisseminated Cultivars: An undisseminated cultivar must be named with a two-digit numeric prefix and the originator's choice of an original name or possess a wholly numeric identifier. An un-

ADS Classification and Handbook of Dahlias Key to Class Numbers

Table 1 is for Sized Dahlias. The left portion of the table shows the Size and corresponding 1st digit. The right side shows the Form and the corresponding 2nd digit.

Table 2 is for Other Forms. Because there is no size involved, each form has its own corresponding 2 digits.

Table 3 is for Color. This table is used in conjunction with either table 1 or table 2.

See examples on the next page.

Example I: a B-IC-FL would be a 2412. B size, 1st digit is 2; IC, 2nd digit is 4 (1st & 2nd digits come from Table 1); FL, Flame, is 12 (from Table 3).

Example 2: a WL-DP would be a 7305. WL is a 73 (from Table 2); DP, Dark Pink, is 05 (from Table 3).

Example 3: working backwards, a 4010 would be M-FD-LB. 1st digit, 4, is M; 2nd digit, 0, is FD (1st & 2nd digits come from Table 1); last two digits, 10, is LB, Light Blend (from Table 3).

Example 4: working backwards, a 9015 would be a CO-BL First 2 digits 90, is CO (from Table 2); last two digits, 15, is BI, Bicolor (from Table 3).

ADS Classification and Handbook of Dahlias Alphabetical Listing (p. 16-51)

ABBREVIATIONS FOR ORIGINATORS FROM THE UNITED STATES AND CANADA

WESTERN REGION: THE ORIGINATOR ABBREVIATION WILL BE FOL-LOWED BY A HYPHEN. EXAMPLE: AM-

CENTRAL REGION: THE ORIGINATOR ABBREVIATION WILL BE FOL-LOWED BY A PERIOD, EXAMPLE: BO,

EASTERN REGION: THE ORIGINATOR ABBREVIATION WILL BE FOL-LOWED BY AN APOSTROPHE. EXAMPLE: BKE'

NOTE: See ABBREVIATIONS AND COUNTRIES prior to the table where cultivars are listed by classification number.

ABBREVIATIONS FOR FOREIGN ORIGINATORS

All foreign originators will not have any diacritical marks following the abbreviation. EXAMPLE: GE

ALPHABETICAL LISTING OF DAHLIA CULTIVARS

For blooms with more than one color (hue, tint, and tone) in evidence, colors are indicated by dominant color first and then secondary color(s) in order of most color representation.

1st Column — Name of Cultivar 2nd Column — ADS Classification Number 3rd Column — Cultivar Size 4th Column — Cultivar Form 5th Column — Cultivar Color Class 6th Column — Cultivar Color Description 7th Column — Originator Abbreviation 8th Column — Cultivar Year of Introduction or *. The asterisk (*) indi- cates that the exact date of introduction is not known and that the variety has been in open competition at least since this date.

Stanley Johnson Medal Winners

STANLEY JOHNSON MEDAL WINNERS

The Stanley Johnson Medal is awarded to the cultivar that has the most higher awards in a given growing season. The Award can be won only once. The following are Stanley Johnson Medal Winners and the year they won the most higher awards:

21

1986	APRIL DAWN
1987	MAGIC MOMENT
1988	WALTER HARDISTY
1989	HAMILTON LILLIAN
1990	ZORRO
1991	HAMARI ACCORD
1992	JESSICA
1993	INLAND DYNASTY
1994	SPARTACUS
1995	MARY JO
1996	ROSE TOSCANO
1997	EDNA C
1998	JESSIE G
1999	TARATAHI LILAC
2000	GLENBANK TWINKLE
2001	CORNEL
2002	KATHY'S CHOICE
2003	KENORA JUBILEE
2004	EMBRACE .

2005	VALLEY PORCUPINE
2006	CAMANO PET
2007	MARY'S JOMANDA
2008	PAM HOWDEN
2009	CAMANO SITKA
2010	MIDNIGHT STAR
2011	ELVIRA
2012	LAKEVIEW GLOW
2013	VERRONE'S MORNING STAR
2014	PARKLAND RAVE
2015	AC ABBY
2016	FANCY PANTS
2017	AC BEN
2018	CLEARVIEW DANIEL
2019	CLEARVIEW EDIE
2020	(NO SHOWS)
2021	BLOOMQUIST JEAN &
	HOLLYHILL BLACK BEAUTY

Les Connell Medal Winners

LES CONNELL MEDAL WINNERS

The Les Connell Medal is awarded to the cultivar that has the most total awards in the first 5 years since introduction.

- 1. The cultivar must have been introduced through either the Trial Garden or Seedling Bench.
- 2. Awards earned prior to the official introduction year are not counted.
- 3. The cultivar need not win an award in each year of the first 5 years.
- 4. The cultivar must still be listed in the CHD on the fifth year otherwise the award will go to the cultivar with the next highest total that is still listed in the CHD.
- 5. In case of a tie, duplicate awards will be given.

2019 KELSEY DWARF 2020 (NO SHOWS)

ADS Classification and Handbook of Dahlias The Fabulous Fifty Fabulous Fifty – The American Dahlia Society

THE FABULOUS FIFTY

The Fabulous Fifty list includes 64 cultivars. During the 2022 growing season these cultivars have received at least 50 blue and higher awards in sanctioned ADS dahlia shows throughout the United States and Canada.

The Fabulous Fifty is composed of the following groups: AA 5, A 6, B 9, BB 7, M 6, BA 6, MB 2, P 2, ST 2, WL 1, NX 1, PE 1, MPE 2, AN 2, MNO 1, CO 2, MCO 1, O 1, MO 1, OT 2, S 1, MS 3.

Cultivars are ranked according to number of higher awards (column 2).

Column identification, left to right.

Lou Paradise and Karen Sanches ADS Classification

ADS Classification and Handbook of Dahlias Key Take-Aways

Why grow ADS classified dahlias? Why grow winners?

- Winners typically have the characteristics that are appealing to all; strong stems, prolific blooms, symmetrical, full petal count, good tuber production, long lasting, good attitude ^(C)
- Dahlia cultivars that are winners in your region have a high probability of successfully growing in your garden
- Dahlia winners produce tubers that reliably store
- ADS classified dahlias are more readily available for purchase
- ADS show winners can be found @ www.dahlia.org
 - The Fabulous Fifty Fabulous Fifty The American Dahlia Society
 - Cream of the Crop Cream of the Crop The American Dahlia Society

Can I grow tubers purchased from Costco? Telly's? Other?

Absolutely. Grow what you love!

"You can learn to love a winner"

Wilson Garner
